

Naval Architect | Technical Department

Thenamaris ConBulk is seeking a Naval Architect to join the Technical Department on a temporary basis, supporting the Superintendent Engineers in a year of significant dry-dock activity scheduled for the dry vessels under management.

The selected individual will support the Superintendent Engineers in a range of office-based tasks and activities ranging from repair and maintenance coordination, class & vessel follow-up to vetting support.

This opportunity is ideal for recent graduates or professionals with some experience in shipping who are eager to learn, grow and gain exposure to a work environment. The role offers the chance to collaborate with top caliber professionals of the shipping industry and gain valuable experience.

The position is temporary, with prospects linked to the future number of vessels under management.

 **Location:** Athens (Vouliagmeni), Greece.

Qualifications

- University degree in Naval Architecture and Marine Engineering
- Some prior working experience including internships, ideally in shipping companies and specifically in a Technical department will be considered, though not required
- Excellent communication skills
- Ability to work well in a team
- Excellent use of Microsoft Office suite
- Proficiency in English at an oral and written level

Additional Information
